

Digital Imaging

MRO's Best in KLAS Release of Information platform now releases fully digital medical images

Fulfill requests faster without burning and shipping discs

Image requesters experience faster digital fulfillment of images, reducing the administrative burden on HIM and radiology departments.

Ease continuation of care and improve the patient experience

Patients experience simple, instant access to their images, putting them back in control of their personal information.

The only digital imaging solution that empowers fully-automated workflows, while eliminating discs.

- 30-minute installation on any PACS, regardless of the number of PACS or nodes
- Electronic delivery of uncompressed DICOM images
- Audit trails detailing every time images are accessed
- Purpose-built to reduce administrative burdens on HIM departments
- ✓ HIPAA-compliant and SOC 2 Type 2, ISO 27001 information security
